Art Unit: 3742

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 is provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of copending Application No. 10/823,053. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 42-73 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 32-36, 41, 42, 45, and 46 of U.S. Patent No. 6,725,083. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims either merely broaden the scope of the patented claims, or recite such limitations as shape, aspect ratio, or composition, all of which are conventionally determined by the particular cavity and location to be marked.

Claim Rejections - 35 USC § 102

Art Unit: 3742

Claim 1, 56, and 57 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. 5289831 (US'831).

Referring to Figs 15-18, col. 10, line 50, col. 12, lines 7-67, and col. 13, lines 47-51, US'831 discloses a cylindrical marker 1501 comprising a polymeric ultrasound detectable body 1503, a 'radiopaque' stainless steel marker 902, and a titanium band marker 1510, carried on a marker exterior, of diameter about 1.65 mm.

Allowable Subject Matter

Claims 42-55 and 60-73 are allowable, subject to the filing of a terminal disclaimer.

Claims 58 and 59 are objected to as being dependent upon a rejected base claim, but would be allowable, subject to the filing of a terminal disclaimer, if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
